PROFESSIONAL PROFILE

Frontend Architect specializing in complex web systems with Vue 3, Nuxt 4, and TypeScript. I apply hexagonal architecture principles to separate domain, application, infrastructure, and interface concerns. I integrate AI tools into daily analysis, implementation, and review while retaining technical ownership and validating the final changes.

SKILLS

Languages: TypeScript, JavaScript, Python, Java

Frameworks and tools: Vue 3, Nuxt 4, React, Angular, Tailwind CSS, Node.js, Pinia, Django, AWS, S3, CloudFront, Git, GitHub

Architecture and practice: Frontend and hexagonal architecture, AI-assisted development, unit, integration and end-to-end testing, legacy migrations, product definition, technical leadership, Agile methods

EXPERIENCE

Hiberus | Sep 2023 - Present

Frontend Developer - Remote

- Lead end-to-end development of a mission-critical web application for Spain's Ministry of Transport using Vue 3, Nuxt 4, and TypeScript.
- Design and evolve modular frontend architecture grounded in hexagonal principles, separating domain, application, infrastructure, and presentation to support maintainability and testability.
- Structure components with Tailwind CSS and Pinia, optimizing component reuse by 40%.
- Partner on functional definition and product decisions, bridging design and backend teams.
- Integrate AI tools into daily analysis, implementation, and review while retaining technical ownership and validating changes.

Fuell | Feb 2022 - Aug 2023

Lead Frontend Developer - Remote

- Led the main web platform and established quality, architecture, and frontend team workflow standards.
- Led the full migration from Vue 2 to Vue 3, reducing load times by 30% and improving the development experience.
- Defined product direction and features with stakeholders, ensuring technical feasibility and scalability.
- Introduced development and code review practices to improve long-term maintainability.

EXPERIENCE (CONTINUED)

Singular | Jun 2020 - Feb 2022

Frontend Developer - Remote

- Built web applications for high-impact clients using Angular and Vue.
- Designed and delivered a Vue application from scratch with unit and integration testing strategies.
- Optimized existing applications to improve performance and scalability.
- During the final semester, balanced responsibilities with technical transition projects at Fuell.

Wegow | Nov 2016 - Jun 2020

Lead Frontend Developer - Madrid

- Led the frontend team and development of the web platform and mobile applications.
- Directed the migration from AngularJS to Nuxt/Vue, modernizing the stack and reducing technical debt.
- Managed AWS infrastructure (S3, CloudFront) with the Python/Django backend team to improve content delivery.
- Contributed to product evolution by translating business goals into technical solutions.

Paradigma Digital | Jun 2016 - Nov 2016

Frontend Developer - Madrid

- Built complex internal web applications for financial institutions, including Banco Santander.
- Implemented interfaces for education projects in multidisciplinary teams using Agile methods.

Paradigma Digital (Yaap) | Jul 2015 - Jun 2016

Frontend Developer - Madrid

- Built frontend features and contributed to technical product definition for digital payment solutions.
- Led frontend work on key projects and contributed to Java backend tasks and automated AWS deployments.

Oneclick | Jun 2014 - Jul 2015

Frontend Developer - Madrid

- Developed education platforms and interactive digital books using standard web technologies.
- Managed projects and full-stack development with PHP backend and custom frontend architectures.

EDUCATION AND LANGUAGES

IES Galileo - Web Application Development (2012 - 2014)

Spanish: Native | English: B2
